

# SOUTHGATE PARK

653 SouthGate Blvd S

Located in the Southgate community of south Lethbridge, this quiet park is a serene reprieve from the bustle of busy city life.

The pond provides habitat for several bird species including mallards and Canada geese, as well as a number of aquatic plants which have established over the past seasons. In summer, several patches of pink water lilies can be seen in the north end of the water, as well as cattails and rushes near the water's edge.

Please note swimming and boating are not permitted on the pond.

Pathways in this park connect to two adjacent parks which also feature ponds, a playground and more paved trails to explore.
