RESPONSE**

CLEAN-UP

All calls received to the SCCC (825-399-SAFE) regarding street behaviours, encampments or biohazard clean-up are received and triaged for action.

OMT attends encampment and determines if site is active or abandoned.

Safety concerns or violations under City Bylaws are determined.

If OMT determines the site is inactive, a clean-up is arranged.

If site is active, OMT continues to provide outreach to connect individuals to services and housing.

A coordinated encampment removal is triggered when there is illegal activity, a safety issue or violation that requires it be removed.

Notification is provided of encampment response dates.

Encampment response partners are coordinated and attend on the scheduled date(s).

If necessary, LPS may provide enforcement.

Encampment and area are cleaned up and follow up is provided.
