

Metis Sewer (Section 2)
 Connects the new sewer to the existing sewer line running through West Highlands. Installing the pipe to Walsh Dr to allow for future extension to Westside Dr

Bridge Dr Sewer River Crossing
 Once the Metis Sewer Project is complete, all wastewater west of Metis Trail can be channelled through this crossing. This will allow for the continued growth of West Lethbridge and provide relief at the original sewer river crossing.

Original Sewer River Crossing
 Currently, the majority of wastewater coming from West Lethbridge channels through this corridor

Metis Sewer (Section 1)
 Existing flow from new subdivisions will be redirected from the Whoop-Up Dr sewer line to the Metis Tr sewer line.

West Lethbridge Sewer Service Areas

- Bridge Dr Service Area
- Original Service Area
- Metis Sewer Project
- Large Sewer Lines
